

Jaheim Walker

St. Andrew, Jamaica | walkerjaheim876@gmail.com | linkedin.com/in/jaheim-walker

OBJECTIVE

IT enthusiast with experience in technical support, troubleshooting, and customer service. Strong interest in information technology, networking, and systems administration.

EDUCATION

The University of the West Indies

Bachelor of Science in Computer Science

(Degree Requirements Completed; Graduation Expected November 2026)

Mona, Jamaica

Sept. 2022 – Present

EXPERIENCE

Humach

Tier 1 Technical Support Agent

May 2024 – Feb. 2025

Mona, Kingston

- Provided customer and technical support through phone and email channels.
- Diagnosed and resolved user-reported technical and access-related issues through troubleshooting and guided support.
- Assisted users with account-related inquiries and platform navigation while maintaining accurate support documentation.

Alorica

Tier 1 Technical Support Agent

May 2023 – Oct. 2023

Half-Way-Tree, St. Andrew

- Assisted customers with account-related inquiries and technical support over the phone.
- Diagnosed hardware, software, and connectivity-related issues affecting customer devices.
- Guided users through setup, activation, and troubleshooting procedures.
- Delivered customer support while maintaining service quality standards and accurate documentation.

National Housing Trust

Office Clerk

July 2022 – August 2022

Kingston, Jamaica

- Managed and organized client documentation while ensuring records were accurately prepared, maintained, and filed.
- Retrieved, reviewed, and analyzed physical and electronic documents to support administrative operations.
- Assisted with document preparation, verification, and quality checks to ensure accuracy and completeness.
- Supported daily office operations through records management, document handling, and data retrieval activities.

PROJECTS

Network Infrastructure and Services Lab

- Built a self-hosted virtualized lab environment using the Proxmox type-1 hypervisor to gain hands-on experience with networking and systems administration concepts.
- Deployed and managed virtual machines including pfSense, Windows Server, Windows, and Linux systems across two nodes.
- Configured a pfSense virtual firewall/router to provide DHCP services, manage network routing, implement firewall rules, and support connectivity between virtual machines hosted across both Proxmox nodes.
- Deployed Active Directory Domain Services, managing users, groups, organizational units (OUs), and shared folders with access permissions in a Windows domain environment.
- Continuously test, troubleshoot, and refine network and system configurations to strengthen technical skills and maintain the lab environment.

TECHNICAL SKILLS

Operating Systems: Proficiency in Windows and foundational knowledge of Windows Server and Linux

Networking: Routing Concepts, DHCP, Network Troubleshooting

Systems Administration: Active Directory Fundamentals, User and Group Management, File Sharing, Access Permissions

Virtualization: Proxmox OS, VirtualBox

Programming: Python, C, HTML/CSS, SQL

Tools: Microsoft Office Suite, Google Workspace, MySQL Workbench
